WORK EXPERIENCE

Senior Software Engineer Maersk

09/2021 - Present

Shipping and logistics company

The Hague, Netherlands

Achievements/Tasks

- Led front-end development for a logistics solution tailored for SMEs, enhancing efficiency and user experience.
- Created comprehensive documentation and established communication protocols between back-end and front-end teams.
- Integrated Pactflow into the CI/CD pipeline as a company-wide initiative to improve contract testing and deployment reliability.
- Managed the end-to-end testing strategy using Selenium, ensuring application stability and performance.
- Initiated the adoption of Test-Driven Development (TDD) in front-end testing, increasing test coverage from 55% to over 80% in collaboration with development teams.
- Developed Java-based applications utilizing Spring Boot, Hibernate, JPA, PostgreSQL and Open API.

Senior Software Engineer Wolters Kluwer Enablon

11/2019 - 08/2021

Achievements/Tasks

The Hague, Netherlands

- Led front-end development for both a safety-focused enterprise application designed to protect workers in hazardous environments and digital shift management solution.
- Developed and maintained scalable and reusable React components.
- Established a Test-Driven Development (TDD) workflow from the ground up as well as end-to-end testing using Selenium and Testcafe ensuring code reliability, stability and maintainability.
- Collaborated on .NET backend development, gaining cross-functional experience in full-stack development.

Full Stack Software Engineer Symphony Solutions

08/2017 - 10/2019

Achievements/Tasks

Skopje, Macedonia

- Led the development of both frontend and backend solutions using a variety of technologies.
- Created and improved reusable frontend components for the design system.
- Built a CMS platform using Laravel to support business requirements.
- Managed backend integration and ensured thorough unit testing for high-quality code.

Lead Software Engineer GSIX

10/2015 - 07/2017

Description

Skopje, Macedonia

- Was responsible for contributing to project development and collaborating with the team to organize tasks and meet deadlines.
- Worked on various projects, focusing on both frontend and backend tasks such as developing user-friendly interfaces, business logic, APIs, designing database schemas, integrating third-party APIs, and conducting code reviews.
